“Don’t Look Down” is a *hard rock* tune. Hard rock first appeared in the late 1960s. It has characteristic heavy bass, long, drawn-out chords, and amplified instruments. To hear more hard rock, listen to artists such as Aerosmith, Metallica, Powerman 5000, the Allman Brothers Band, Rob Zombie, Godsmack, 311, Stone Temple Pilots, Black Crowes, Steve Vai, and Smashing Pumpkins.

LESSON 22

LEARNING THE GROOVE

HOOKING UP TO HARD ROCK

Listen to “Don’t Look Down.” This tune has a standard rock/metal groove. It is a heavy feel, with very simple drum and bass parts. These parts must be simple because they are intended to be played in large arenas, where echoes would make busier parts sound muddy. It’s a case of “less is more.”

During the solos, the guitar doubles the bass, playing power chords in the second part. Doubling the bass is very common in hard rock.

Listen to the first part to “Don’t Look Down.” Find the pulse, and strum dampened strings on the backbeat, along with the snare drum hits.
